PROFILE

Computer engineer with almost two years of production experience on Bizmed HBYS, a hospital information system used in nearly 90 hospitals (Delphi, Oracle PL/SQL), and applied deep learning work on medical images, including an X-ray fracture classifier with 98.2% test accuracy. First-ranked graduate of Siirt University's Faculty of Engineering, now in a thesis-based M.Sc. in Computer Engineering.

EXPERIENCE

Software & Database Specialist · Sinerji Bilişim (Bizmed) · Remote 07/2024 – 04/2026

- Developed custom modules, features and interface controls in Delphi for Bizmed HBYS, a hospital information system used in nearly 90 hospitals, based on hospital client requests.
- Extended the Oracle database behind new features: added tables, columns and PL/SQL functions, and modified existing functions and procedures.
- Found and fixed software bugs across the system.
- Worked in a fully remote, task-based team.

PROJECTS

JobPilot Python, FastAPI, Playwright, SQLite, LLM agents 2026

Multi-agent job-search pipeline: resume parsing, LLM-generated search keywords, 0–100 job matching, tailored applications and reply handling.

install-from-video Python, faster-whisper, yt-dlp, Claude Code 2026

Claude Code skill that turns tool-recommendation videos into verified install commands, with local transcription and npm/GitHub checks.

Bone Fracture Classification Python, TensorFlow, Keras, VGG16, CNN

Graduation project. VGG16 transfer-learning CNN: 98.2% accuracy and 0.98 F1 on 506 held-out X-rays.

Cataract Classification Python, TensorFlow, Keras, VGG16, CNN

VGG16 with custom CNN layers telling immature from mature cataract: 86.6% accuracy on 82 test images.

Hand Signal Classification Python, CNN, OpenCV, Arduino

Real-time gesture recognition (CNN, OpenCV) trained on a self-collected dataset; predictions shown on an Arduino-driven LCD over serial.

Heart Disease Detection Python, Pandas, scikit-learn, KNN, Naive Bayes

KNN and Naive Bayes on 1,190 clinical records; Naive Bayes reached 84.0% test accuracy.

EDUCATION

M.Sc. in Computer Engineering (thesis program) 2026 – Present

Siirt University, Institute of Science and Technology · GPA 86.75 / 100

B.Sc. in Computer Engineering 2021 – 2025

Siirt University · First-ranked student in the Faculty of Engineering · GPA 3.56 / 4.00

SKILLS

Programming	Python, C#, Delphi, JavaScript
Databases	Oracle, PL/SQL, PostgreSQL, Database design
AI & data science	Deep learning (CNN), Machine learning, TensorFlow, Keras, scikit-learn, Pandas, OpenCV
Hardware	Arduino, Serial communication, LCD integration
Systems & tools	HBYS, Remote task management
Languages	Arabic: Native · Turkish: Fluent · English: Intermediate (B1–B2)
